SUMMARY

MCA graduate (July 2026) specialising in applied AI engineering: retrieval-augmented generation, agentic systems and full-stack GenAI applications. Published research at the GCCMIEA International Conference. Built and deployed production-style AI systems using Lang Chain, FastAPI, Supabase and Gemini/Groq APIs, with a focus on evaluation and guardrails over inflated claims.

SKILLS

AI / GenAI: Lang Chain (LCEL), Retrieval-Augmented Generation, Prompt Engineering, Gemini API, Groq, Chroma DB, FAISS, Cross Encoder Reranking, n8n

Backend: Python, FastAPI, Node.js, Express.js, REST APIs, PostgreSQL, MySQL, Supabase

Frontend: React, TypeScript, Tailwind CSS, JavaScript

Cloud / DevOps: Docker, AWS (EC2, S3, IAM, CloudWatch), Vercel, Git

PROJECTS

Ollive AI Assistant *Python, FastAPI, Next.js, SQLite, Hugging Face Spaces*

- Built a dual-model AI assistant comparing an open-source model against Gemini 2.5 Flash under identical tool-use and guardrail constraints, using a FastAPI backend, Next.js frontend and per-session SQLite memory.
- Designed a 30-question evaluation suite spanning hallucination, bias and safety categories with a Recharts observability dashboard and auto-generated PDF reports; tuned behaviour via prompt engineering and guardrails, not fine-tuning.

PDF RAG Chatbot *Python, LangChain LCEL, Chroma DB, Cross Encoder, Gemini 2.5 Flash, Streamlit*

- Built a multi-PDF conversational AI using a hybrid retrieval pipeline (BM25 + Chroma DB dense search) reranked by a Cross Encoder, achieving a RAGAS faithfulness score of 0.97 across 15 evaluation queries.
- Added automatic fallback from Gemini 2.5 Flash to Groq Llama-3.3-70B for high availability and deployed on Hugging Face Spaces with source-attributed responses.

Hire Ready *React, TypeScript, Supabase, Gemini 2.5 Flash, Tailwind CSS*

- Built a full-stack AI career intelligence platform where users paste a job description to receive a weighted match score, missing-skill breakdown and STAR-format interview answers generated from their own project history.
- Implemented JD parsing and grading logic via Gemini 2.5 Flash through Supabase Edge Functions; shipped as an open-source project with 112 commits.

EXPERIENCE

AWS Cloud Intern | Adhoc Network Company, Visakhapatnam *Feb 2024 - Apr 2024*

- Assisted in deploying and configuring AWS resources, including EC2 instances, S3 buckets and IAM roles, across 2 environments.
- Monitored CloudWatch logs under senior guidance and helped identify and resolve 3+ recurring runtime errors.
- Supported debugging and refactoring of backend modules as part of Agile sprint cycles.
- Wrote test cases to validate data processing workflows, covering edge-case inputs.

EDUCATION

Master of Computer Applications (MCA) | Vignan's Institute of Information Technology, Visakhapatnam *Jul 2024 - Jul 2026*
CGPA: 7.71

B.Sc Computer Science | Aditya Degree College, Vizianagaram *Jun 2021 - Apr 2024*
CGPA: 7.27

CERTIFICATIONS

- Generative AI and Web Design — IBM Skills Build
- Python Essentials 1 & 2 — Cisco Networking Academy
