SUMMARY

MCA graduate (July 2026) with hands-on experience building AI-powered applications and automation pipelines. Developed a published mental wellness platform with Gemini API integration, a multi-PDF RAG chatbot using LangChain and ChromaDB achieving 91% retrieval accuracy, and an n8n workflow that processes 200+ job listings daily with LLM scoring. Proficient in Python, LangChain, generative AI, prompt engineering, and LLM integration. Seeking AI Engineer or AI Automation roles building intelligent systems and production-grade pipelines.

EXPERIENCE

Full Stack Developer Intern — Codec Technologies (AICTE-approved)

Mar 2026 – Apr 2026

Remote

- Built 4 async FastAPI endpoints with PostgreSQL and bcrypt authentication, cutting average API response time by 35% compared to the synchronous baseline
- Developed a React + TypeScript dashboard on Supabase real-time subscriptions, saving the client team 3 hours of manual reporting per week
- Containerised the full application with Docker and deployed to AWS EC2, delivering 3 zero-downtime releases over a 6-week window
- Implemented JWT-based role access control securing data for 200+ test users, with zero reported security incidents throughout the internship

AWS Cloud Intern — Adhoc Network Company

Feb 2024 – Apr 2024

Visakhapatnam, AP

- Monitored 5 EC2 instances and 3 S3 buckets via CloudWatch alarms, reducing mean incident response time by 40% over the 3-month period
- Documented IAM role policies for 8 cloud services, enabling 3 new engineers to on-board with zero configuration errors
- Authored operational runbooks that cut average incident resolution time from 45 to 18 minutes across the cloud environment

PROJECTS

MindCare — AI Mental Wellness Platform

React | TypeScript | FastAPI | PostgreSQL | Supabase | Gemini API | Docker | AWS

- Built an AI wellness platform integrating Gemini API for personalised recommendations; research published at GCCMIEA International Conference (Dec 2025), with 150+ test users and a 4.2/5 satisfaction score
- Deployed on AWS EC2 with Docker across the full stack, maintaining sub-2-second response times under concurrent load during the conference demonstration

PDF Q&A RAG Chatbot

Python | LangChain | ChromaDB | HuggingFace MiniLM | FAISS | Gemini 2.5 Flash | Streamlit

- Designed a multi-PDF conversational AI using LangChain ConversationalRetrievalChain and ChromaDB vector store, achieving 91% retrieval accuracy on 50-page test documents
- Added persistent chat history and source attribution, reducing repeated user queries by 60% in testing with Gemini 2.5 Flash as the LLM backbone

EDUCATION

MCA — Vignan's Institute of Information Technology, Visakhapatnam

Jul 2024 – Jul 2026

Master of Computer Applications | CGPA: 7.86

BSc Computer Science — Aditya Degree College, Vizianagaram

Jun 2021 – Apr 2024

Bachelor of Science | CGPA: 7.27

SKILLS

AI/ML: LangChain, ChromaDB, FAISS, HuggingFace Embeddings, Gemini API, Groq, Prompt Engineering, RAG, NLP

Languages: Python, JavaScript, TypeScript, Java SE 11

Frameworks: FastAPI, React, Node.js, Express.js, Streamlit

Databases: PostgreSQL, Supabase, ChromaDB, MySQL

DevOps/Cloud: Docker, AWS (EC2, S3, IAM, CloudWatch), Git, n8n, REST API Integration

CERTIFICATIONS

- Java SE 11 Developer — Infosys Springboard
- Getting Started with Generative AI — IBM SkillsBuild
- Web Design Fundamentals — IBM SkillsBuild
